

Modern's Rapid Response Manhole Core Drilling 20 Structures in 3 Days*

State-of-the-art computer controlled core drilling allows Modern to rapidly provide your required products. Core drilled holes are:

- Neat and precise
- Available from 8" to 42" diameters
- A quick turnaround on 48" diameter Manholes

Place your order today with Site & Highway Sales. Call 484-548-6200.

**Subject to prior commitments. Channeling and coating may require additional time.*

Modern Provides Reinforced Concrete Pipe (RCP), and Install the Gaskets

Why should gaskets be installed during manufacturing?

Integral gaskets decrease installation time, minimize jobsite hassles, and reduce the risk of gasket or spigot failure.

Why is Modern's pipe so heavy?

Our pipe is extremely dense due to a patented vibration system. This results in greater bell durability, less damage from handling, and optimal strength.

Why don't I need to dig bell troughs when installing the pipe?

Our concrete density allows us to produce pipe with minimal or no bell off-set, allowing for a faster and safer installation.

What types of pipe does Modern manufacture?

Modern manufactures class 3, 4, and 5 RCP in most standard sizes, and to meet regional and local pipe certifications.

What else is cool about Modern's pipe?

In addition to our integral gasket, lack of bell off-sets, and pipe density; we cast (rather than dig) our lifting holes to eliminate cracking or mushrooming. We have the most advanced cage and RCP production systems in the world, and we provide all the precast structures along with RCP or HDPE pipe.

Where can I learn more?
